

ESHTHA BANGA

Full-Stack Developer | AI/ML Enthusiast

Gurgaon, Haryana | eshthabanga@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

B.Tech CSE (AI/ML) student and full-stack developer with hands-on experience building AI-powered applications, blockchain-based platforms, and responsive web products. Proficient in Python, JavaScript, React.js, and Generative AI, with 47+ public repositories reflecting consistent, independent project delivery. Currently contributing to technical teams across multiple student-led organizations, with a strong focus on turning ideas into functional, user-centered digital experiences.

EDUCATION

KR Mangalam University, Gurgaon, Haryana 2025 – Present

B.Tech in Computer Science Engineering (AI & ML)

BS International School, West Delhi 2024 – 2025

Class XII

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, TypeScript, SQL

Frameworks: React.js, Node.js, Tailwind CSS, HTML5, CSS3

Backend/Cloud: MongoDB, MySQL, RESTful APIs, Supabase, Firebase

Web3: Blockchain Concepts, Decentralized Application (dApp) Design

AI: Generative AI, Pandas, NumPy

Tools: Git, GitHub, Figma, Vercel, VS Code, UI/UX Design

EXPERIENCE

GeekRoom KRMU — *Core Team Member* Sep 2026 – Present

- Serve as a core team member driving technical initiatives and community-facing developer activities for the campus tech community.
- Collaborate with peers on event execution, technical content, and project support within the GeekRoom ecosystem.

Thrylos — *Technical Team Member (Remote)* Jan 2026 – Jul 2026

- Lead tech administration initiatives, coordinating technical operations across ongoing remote team projects.
- Collaborated with cross-functional members to plan, build, and deliver technical solutions on schedule.

Tech TribeX — *Technical Team Member (Remote)* Sep 2025 – Aug 2026

- Contributed to the core tech team, supporting development, React.js implementation, and SEO-focused technical execution.
- Worked collaboratively with peers to troubleshoot issues and refine product features across a one-year engagement.

PROJECTS

Question Forge AI, *Python, Generative AI, Web Frameworks*

- Engineered an automated academic assessment tool using Generative AI and Bloom's Taxonomy to generate balanced question papers.
- Developed backend architecture in Python, integrating LLMs to dynamically process and scale educational parameters.

Shared Network Data Annotation OS, *Python, Distributed Systems, RTOS*

- Designed a real-time, distributed OS concept for high-throughput data annotation pipelines with RTOS-style CPU scheduling.
- Architected multi-client windowing and dynamic concurrency queues to enable secure, simultaneous labeling across cloud, edge, and local nodes.

Club Reporting & Donor Transparency Platform, *Web App, Automation, Financial Reporting*

- Built a platform automating donation, expense, and donor-wise fund reporting for charity clubs to replace manual tracking.
- Designed data flows to improve reporting accuracy and financial transparency for club administrators and donors.

VANGUARD, *React.js, Vite, Tailwind CSS, Recharts*

- Built a real-time cybersecurity threat-intelligence dashboard that parses CVE data into an interactive command-center UI.
- Implemented dynamic severity filtering and visual analytics (donut and bar charts) using Recharts and React Router for seamless SPA navigation.

notedbyaddie, *HTML5, UI Design*

- Designed and deployed a lightweight, single-page notes web app (notedbyaddie.vercel.app) with a clean, minimal interface.

CERTIFICATIONS

- Machine Learning & Natural Language Processing Workshop — Certificate of Completion, K.R. Mangalam University (COE – AI)
- AI For All — Certificate of Participation, Tech4Hack in support of Assist Flow, Microsoft Office Gurugram (Jan 2026)
- IDEAS 3.0 — Certificate of Appreciation for Project Display (RC Car), K.R. Mangalam University Innovation & Ideathon Fest (Nov 2025)
